

ACTIONABLE **INTELLIGENCE**
FROM COMPLEX **DATA**

HPC User Forum

April 13, 2015

Information—**the fuel of business**—is trapped
in analysis platforms built on slow,
unsustainable 70-year old architectures.

The Ryft ONE™ : More data. Less center. Faster insights.

Accelerate business insights with the only platform purpose-built to simultaneously analyze any type of data—historical and streaming, unstructured and multi-structured—

100X faster with 70% lower TCO.

The Ryft ONE is powered by a breakthrough in **Real-time Data Analysis.**

The only open 1U platform capable of analyzing streaming, historical, unstructured, and multi-structured data in real-time at **10 GB/second.**

Ryft ONE eliminates all bottlenecks that strangle conventional systems by combining these two innovations:

The Ryft Analytics Cortex™

Ryft ONE leverages a massively parallel bitwise computing architecture to deliver unprecedented performance from the smallest possible form factor.

The Ryft Algorithm Primitives™ Library

Each Ryft ONE comes with a subscription to this growing collection of pre-built algorithm components, and an open API to leverage them.
